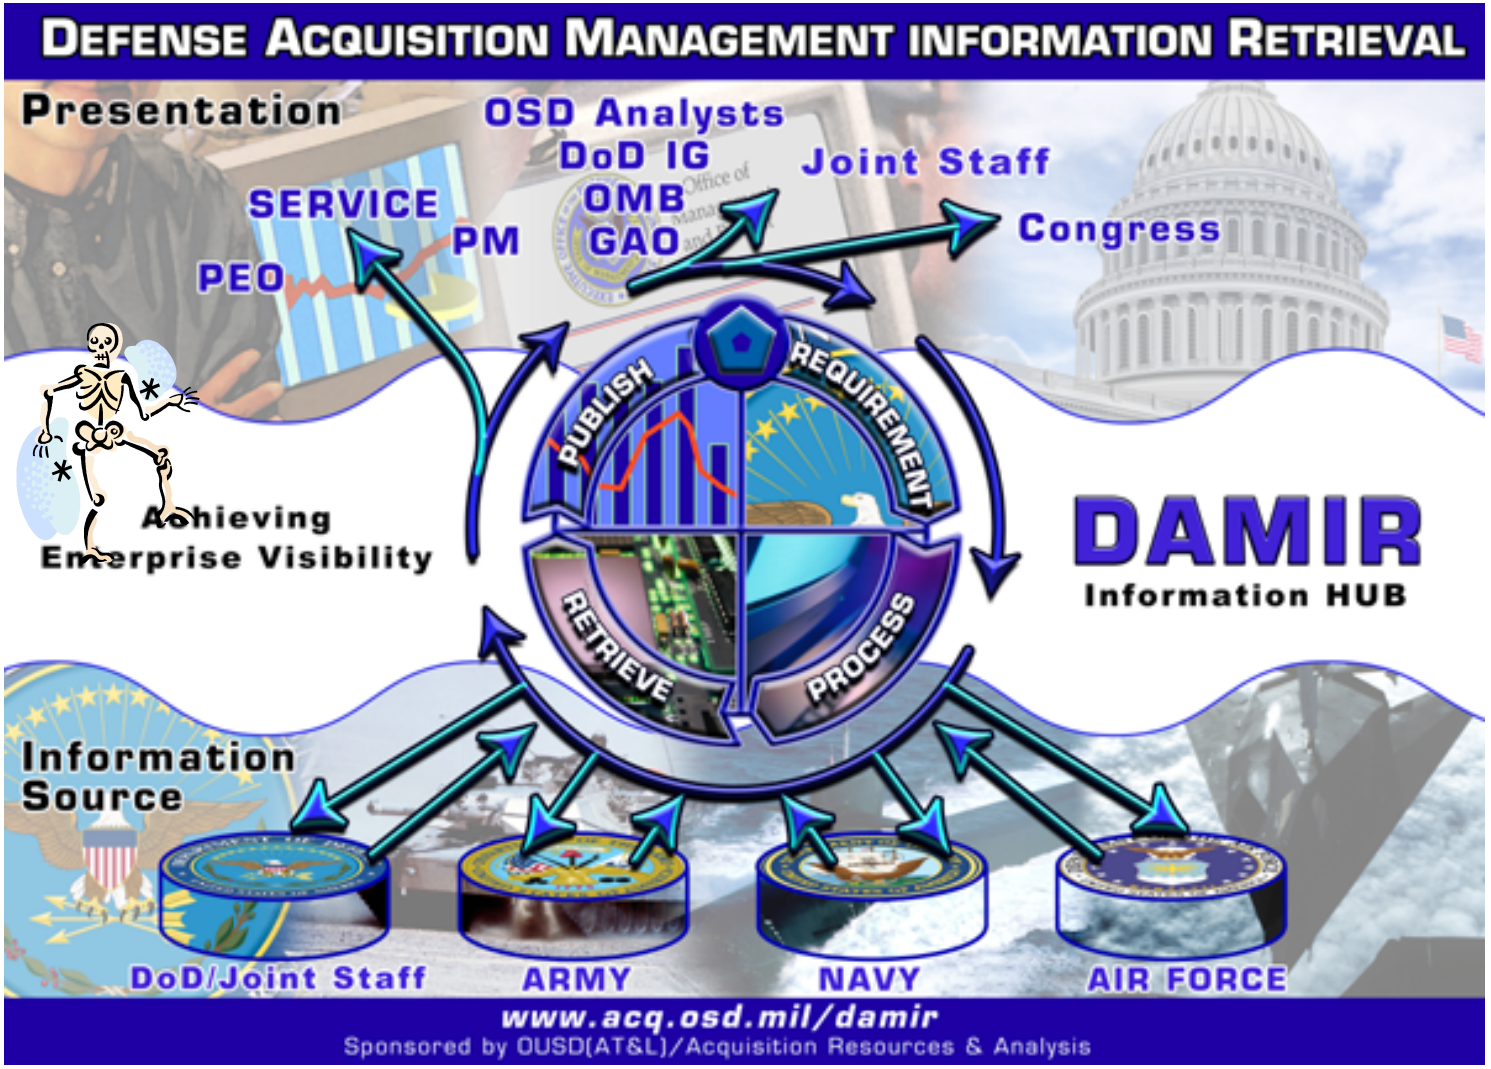
DAMIR Vision

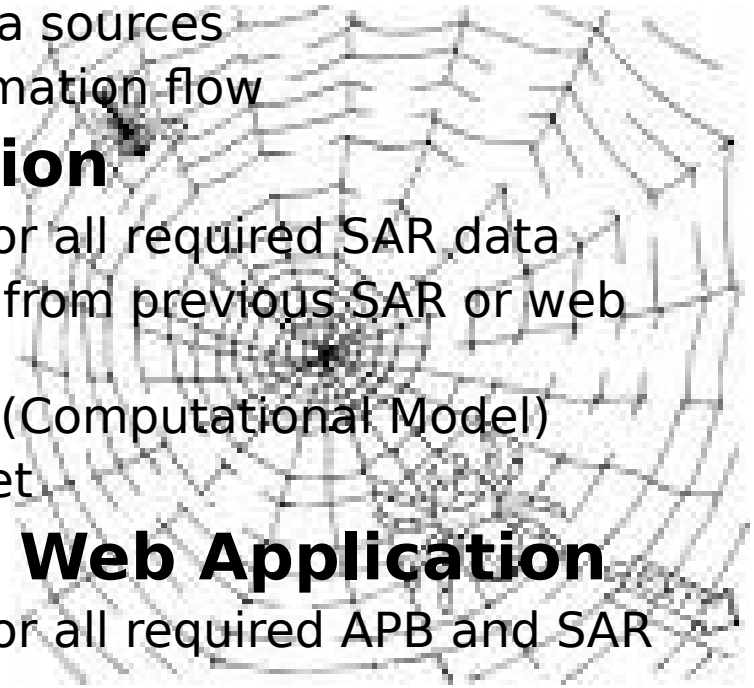


Current DAMIR Components and Features

- **Purview**
  - Web-based Executive Information System that provides access to current and historical CARS information on the desktop
    - Includes both MDAP and MAIS programs
    - Includes DAES, SAR and APB information
- **Virtual Library**
  - Net-centric solution to access unstructured information
  - COTS tool
- **DAES Review**
  - OSD tool for rating program performance
- **Web Services Architecture**
- **DAMIR Reports**
  - Analysis and Ad Hoc Reporting
- **Supporting Documentation**

Coming Soon with DAMIR 3.0

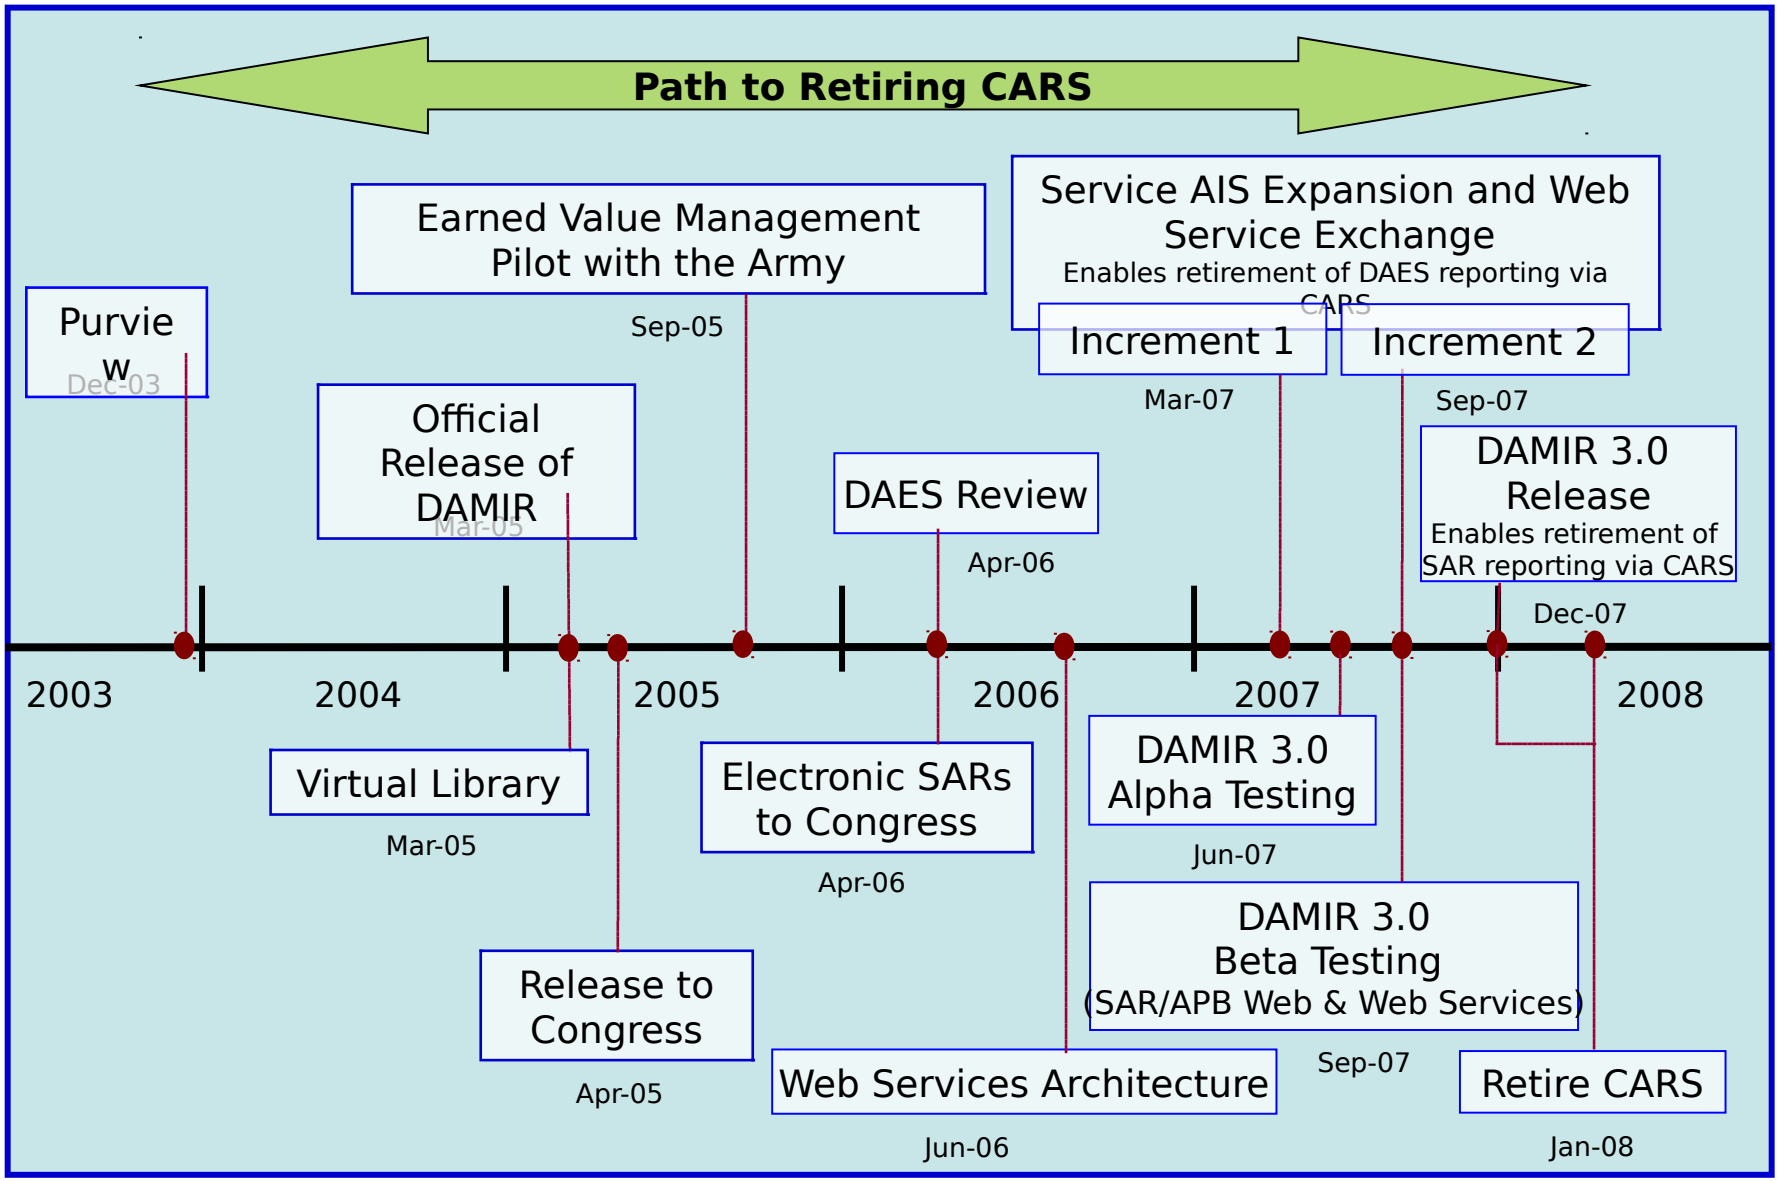
- **Expanded Web Services Architecture**
  - Supports the retirement of DAES Reporting in CARS
  - Leverages existing data sources
  - Enables two-way information flow
- **SAR Web Application**
  - Data entry capability for all required SAR data
  - Ability to pre-populate from previous SAR or web service submissions
  - Cost Variance Support (Computational Model)
  - Cost Funding Worksheet
- **APB/SAR Baseline Web Application**
  - Data entry capability for all required APB and SAR baseline data
  - Ability to pre-populate from previous baseline information or web service submissions
- **Classified DAMIR**
- **Enhanced Analysis and Reporting**



Key Features

- Automated Approval/Release Process
- Import
- Discussion/Comments
- Classified Data Indicators
- Search
- Alerts
- RSS News Feeds

DAMIR Major Milestones



DoD's Initiative on Portfolio Management/Data Transparency

In advance questions to the Senate Confirmation Committee for the position of OUSD/AT&L on the subject of Open, Transparent and Common Shared Data Resources:

"The Department needs better information tools for use in managing its portfolio of programs and in monitoring progress in program execution. The DAMIR system represents an effort to fill some of these gaps. If confirmed, I will review this initiative for any additional support or direction needed."

- The Honorable John Young
